1. INTRODUCTION:

OVERVIEW:

In this project, we have discussed about the topic, "Exploring world's top You Tube channel". A subscriber to a channel on the video-sharing YouTube is a user who has chosen to receive the channel's content by clicking on that channel's "Subscribe" button, and each user's subscription feed consists of videos published by channels to which the user is subscribed. The ability to subscribe to users was introduced in October 2005. YouTube began publishing a list of its most-subscribed channels in April 2006. An early archive of the list dates to May 2006. The following table lists the 50 most-subscribed YouTube channels, as well as the primary language and content category of each channel. The channels are ordered by number of subscribers; those whose displayed subscriber counts are identical are listed so that the channel whose current growth rate indicates that its displayed subscriber count will exceed that of the other channel is listed. This is the overview of our project.

PURPOSE:

The main purpose of YouTube is to provide a platform for users to watch, share and create videos. And it should be noted that, in the last decade, YouTube has just become the most popular video-sharing platform in the world.

We can put as simply as, YouTube subscribers are refer to the people or account, that are subscribed to your channel. So, whenever you upload a new video, your subscribers will be able to see it in their feeds. This makes your subscribers more likely to watch the videos you upload.

We may also start getting notifications when a channel you subscribe to publishes new content. By default, the highlights only send to you from the channel. We can achieve the knowledge given by Creators flexibility in videos and help us to start filming, sharing and finding your fandoms depending on the way you like to create.

Overall, the purpose of YouTube channel is to provide a space where people can easily watch and share videos with one another. It has become an incredibly popular part of the internet.
